## ABOUT THIS TRAINING

This 1-day workshop, is designed to tap into local expertise by convening key stakeholders to develop a “map” that illustrates how people with mental and substance use disorders come in contact with and flow through the local criminal justice system. This map identifies opportunities and resources for diverting people to treatment and gaps in services. PRA has facilitated workshops for communities across the United States and has been at the forefront of the model’s evolution, including the development of Intercept 0 and a renewed emphasis on front-end strategies to reduce incarceration.

### Since 2004 PRA has held:

## OBJECTIVES

- PRA provides examples of successful systems integration, promising programs, and emergent collaborations from around the United States
- Participants establish a local set of priorities for change

## PLANNING FOR ACTION

- This 1/2-day optional addition to the SIM workshop is a guided strategic planning exercise enabling communities to craft cohesive, integrated service delivery strategies.

## BENEFITS

- Facilitates cross-system communication and collaboration
- Helps identify underused resources
- Improves the early identification of people with co-occurring disorders who come into contact with the criminal justice system, increases effective service linkage, reduces the likelihood of people recycling through the criminal justice system, enhances community safety, and improves quality of life

## FACILITATOR TRAINING

- This 2-day event is designed to teach participants how to deliver the SIM workshop in their communities by reviewing the training design and tools, including the Sequential Intercept Model; training participants in facilitation skills; and engaging participants in practice sessions

## SIM WEBSITE
